

Archiving File & Compress File

04 December 2024

14:27

1. tar

- tar <-option> <compress_filename>.tra <file_to_be_compress>
- tra -cvf /backup.tra /etc
 - Option
 - -c create and archive.
 - -f file name (compulsory option).
 - -v verbose or view.
 - -t list the content from archive.
 - -x execute the content from archive.
 - -P preserve permission when extracting file or directory.
 - -C copy content from an archive to another directory.

2. du -hs backup.tar

- File Size show 1

3. tar -xvf backup.tar -C /home

- Other location file extract using (-shift+c)

4. gzip

- tar -czvf /backup1.tar.gz /etc
- Compress the file and reduce the size
- Change the extension .gz
- firstly archiving the file and after using this command

5. gunzip <file_name>

- Remove the compress

6. tar -czvf /<file_name>.gz /etc (gzip)

- archiving and compress at the one command

7. tar -xzvf <file_name> -C /<dir> (gzip)

- archiving and compress at the one command remove

8. bzip2 <file_name>

- tar -cjvf /backup12.tar.bz2 /etc
- Compress the file compare to gzip file are more reduce the size
- Change the extension .bz2
- firstly archiving the file and after using this command

9. bunzip2 <file_name>

- Remove the compress

10. `tar -cjvf <file_name>.bz2 /etc` (bzip2)
 - archiving and compress at the one command
11. `tar -xjvf <file_name> -C /<dir>` (bzip2)
 - archiving and compress at the one command remove
12. `xz <file_name>`
 - `tar -cJvf /backup3.tar.xz /etc`
 - Compress the file and reduce the size compare to bz2 file are more reduce the size
 - Change the extension .xz
 - firstly archiving the file and after using this command
13. `unxz <file_name>`
 - Remove the compress
14. `tar -cJvf /<file_name>.xz /etc` (xz)
 - archiving and compress at the one command
15. `tar -xJvf <file_name> -C /<dir>` (xz)
 - archiving and compress at the one command remove

1. Using tar

- **Command Format:**
`tar <options> <archive_filename>.tar <file_to_compress>`
- **Example:**
`tar -cvf /backup.tar /etc`
- **Options:**
 - `-c` : Create an archive.
 - `-f` : Specify the filename (mandatory).
 - `-v` : Verbose, displays the progress.
 - `-t` : List the contents of an archive.
 - `-x` : Extract the content from an archive.
 - `-P` : Preserve permissions while extracting.
 - `-C` : Change the directory before processing files.

2. Check File Size

- **Command:**
`du -hs backup.tar`
- **Description:**

Displays the size of the backup.tar file in a human-readable format.

3. Extract to Another Location

- **Command:**
`tar -xvf backup.tar -C /home`
- **Description:**
Extract the contents of backup.tar to the /home directory.

4. Compress Using gzip

- **Command:**
`tar -czvf /backup1.tar.gz /etc`
- **Description:**
Archive and compress the /etc directory into backup1.tar.gz.

5. Decompress Using gunzip

- **Command:**
`gunzip <file_name>.gz`
- **Description:**
Decompresses a .gz file.

6. Archive and Compress Using gzip (One Command)

- **Command:**
`tar -czvf <file_name>.gz /etc`
- **Description:**
Combines archiving and compressing into one command.

7. Extract .gz File to a Directory

- **Command:**
`tar -xzvf <file_name>.gz -C /<dir>`
- **Description:**
Extracts a .gz compressed archive to the specified directory.

8. Compress Using bzip2

- **Command:**
`tar -cjvf /backup12.tar.bz2 /etc`
- **Description:**
Archives and compresses /etc into a .bz2 file. bzip2 provides better compression than gzip.

9. Decompress Using bunzip2

- **Command:**
`bunzip2 <file_name>.bz2`
- **Description:**
Decompresses a .bz2 file.

10. Archive and Compress Using bzip2 (One Command)

- **Command:**
`tar -cjvf <file_name>.bz2 /etc`
- **Description:**
Combines archiving and compressing into one command.

11. Extract .bz2 File to a Directory

- **Command:**
`tar -xjvf <file_name>.bz2 -C /<dir>`
- **Description:**
Extracts a .bz2 compressed archive to the specified directory.

12. Compress Using xz

- **Command:**
`tar -cJvf /backup3.tar.xz /etc`
- **Description:**
Archives and compresses /etc into a .xz file. xz provides better compression than bzip2.

13. Decompress Using unxz

- **Command:**
`unxz <file_name>.xz`
- **Description:**
Decompresses a .xz file.

14. Archive and Compress Using xz (One Command)

- **Command:**
`tar -cJvf <file_name>.xz /etc`
- **Description:**
Combines archiving and compressing into one command.

15. Extract .xz File to a Directory

- **Command:**
`tar -xJvf <file_name>.xz -C /<dir>`
- **Description:**
Extracts a .xz compressed archive to the specified directory.
