

User Administration in Linux

28 November 2024 16:08

1. Types of User

- Root user (supper user)
They have all privilege. Root user cannot ask password logging to root user after switch the local user they time they are ask the password. The root user can have the permission change the password. Id number are to provide to 0 0
- Standard user (local user)
They have limited privilege. They have not change the password. Id number are to provide to 1,000 - 65,000 and they are switch the user they are asking the password
- System user
Id number are to provide to 1 - 999 (ssh server run system user manage the on behalf of root user)

2. Commands

- **useradd <user_name>** (directly add user)

```
root@6749f36574bb88419b4c70a5:~# useradd rani
root@6749f36574bb88419b4c70a5:~#
```

- **adduser <user_name>** (asking the password but password they are not show typing time)

```
root@6749f36574bb88419b4c70a5:~# adduser vaishali
Adding user `vaishali' ...
Adding new group `vaishali' (1000) ...
Adding new user `vaishali' (1000) with group `vaishali' ...
Creating home directory `/home/vaishali' ...
Copying files from `/etc/skel' ...
New password:
Retype new password:
Sorry, passwords do not match.
passwd: Authentication token manipulation error
passwd: password unchanged
Try again? [y/N] 123456
Changing the user information for vaishali
Enter the new value, or press ENTER for the default
    Full Name []: vaishali
    Room Number []: 1
    Work Phone []: 1234567890
    Home Phone []: 789456123
    Other []: 25862041455
Is the information correct? [Y/n] y
```

- **cat /etc/passwd** (show the all information in the passwd file)

```
redis:x:114:123:/:var/lib/redis:/usr/sbin/nologin
vaishali:x:1000:1000:vaishali,1,1234567890,789456123,25862041455:/home/vaishali:/bin/bash
rani:x:5001:5001:/:home/rani:/bin/sh
root@6749f36574bb88419b4c70a5:~#
```

- **passwd <username>** (allotted the password to the use)

```
root@6749f36574bb88419b4c70a5:~# passwd rani
New password:
Retype new password:
passwd: password updated successfully
```

- **exit** (exit the path)

```
vaishali@6749f36574bb88419b4c70a5:/root$ exit
exit
root@6749f36574bb88419b4c70a5:~#
```

- **su - <username>** (swich the user to anther user)

```
root@6749f36574bb88419b4c70a5:~# su vaishali
vaishali@6749f36574bb88419b4c70a5:/root$
```

- `cd /home`

```
root@6749f36574bb88419b4c70a5:~# cd /home
root@6749f36574bb88419b4c70a5:/home# tail -5 /etc/passwd
```

- `tail -5 /etc/passwd` (show the last five line in passwd)

```
root@6749f36574bb88419b4c70a5:/home# tail -5 /etc/passwd
mysql:x:113:122:MySQL Server,,,:/var/lib/mysql:/bin/false
mongodb:x:999:999:./home/mongodb:/bin/sh
redis:x:114:123:./var/lib/redis:/usr/sbin/nologin
vaishali:x:1000:1000:vaishali,1,1234567890,789456123,25862041455:/home/vaishali:/bin/bash
rani:x:5001:5001:./home/rani:/bin/sh
root@6749f36574bb88419b4c70a5:/home#
```

- `userdel <username>` (delete the user using this command)

```
vaishali:x:1000:1000:vaishali,1,1234567890,789456123,25862041455:/home/vaishali:/bin/bash
rani:x:5001:5001:./home/rani:/bin/sh
root@6749f36574bb88419b4c70a5:/# userdel rani
-bash: userdel rani: command not found
root@6749f36574bb88419b4c70a5:/# userdel rani
root@6749f36574bb88419b4c70a5:/# tail -3 /etc/passwd
mongodb:x:999:999:./home/mongodb:/bin/sh
redis:x:114:123:./var/lib/redis:/usr/sbin/nologin
vaishali:x:1000:1000:vaishali,1,1234567890,789456123,25862041455:/home/vaishali:/bin/bash
root@6749f36574bb88419b4c70a5:/#
```

- `tail /etc/shadow`

```
root@6749f36574bb88419b4c70a5:/# tail /etc/shadow

- `ls -a`

```
root@6749f36574bb88419b4c70a5:/# ls -a
. .dockerenv boot data etc lib lib64 mariadb_repo_setup mnt proc run snap sys usr
.. bin code-server_4.18.0_amd64.deb dev home lib32 libx32 media root sbin srv tmp var
```

- `cd username/`

- 'chage' (change age) command use to view or modify password policy of user.
- Syntax,
- # chage
- Options,
 - -l :- list / view password policy.
 - -m :- min. days between password change
 - -M :- maximum days between password change.
 - -W :- number of days of warning.
 - -I :- number of inactivation days.
 - -E :- Expiry date of user account.
 - -d :- force to change password.

- **grep** (
grep [OPTION]... PATTERNS [FILE]...
Search for PATTERNS in each FILE.
Example: grep -i 'hello world' menu.h main.c
PATTERNS can contain multiple patterns separated by newlines.)

- E, --extended-regexp PATTERNS are extended regular expressions
- F, --fixed-strings PATTERNS are strings
- G, --basic-regexp PATTERNS are basic regular expressions
- P, --perl-regexp PATTERNS are Perl regular expressions
- e, --regexp=PATTERNS use PATTERNS for matching
- f, --file=FILE take PATTERNS from FILE
- i, --ignore-case ignore case distinctions in patterns and data
- no-ignore-case do not ignore case distinctions (default)
- w, --word-regexp match only whole words
- x, --line-regexp match only whole lines
- z, --null-data a data line ends in 0 byte, not newline

- **usermod**
 - **Modification in the user using the option**
 - -u (user id)
 - -g (primary group)
 - -c (comment)
 - -d (home directory)
 - -s (login shell)
 - -G (secondary group)
 - -r (system user)
 - -

1. Files

- /etc/passwd --user information
- /etc/shadow --user password information
- /etc/group --group info
- /home
- UID & GID
- Skeleton file --
- Cd /var/spool/mail/

HW:

Create a new user and go to home directory command ls -a and delete the file rm -rf enter the user find the solution
